## 1 L'IFESO, institut de la formation au commandement des opérations

La compréhension des enjeux d'une crise alliée à la maîtrise des processus permettant une combinaison optimale des instruments de puissance disponibles constitue une capacité essentielle pour un état ou une organisation régionale ou internationale.

Se doter d'une telle capacité nécessite la constitution d'un vivier d'officiers regroupant un large socle de compétences. Mises ensemble, ces compétences innervent les états-majors du niveau stratégique au plus bas niveau tactique, en passant par le niveau opératif pour préparer, planifier, conduire et évaluer les opérations. L'aptitude au commandement des opérations passe par l'acquisition de **processus**, de principes de **management** et du **champ de conscience** du niveau considéré, trois dimensions qui diffèrent en fonction du niveau considéré.

L'acquisition puis le maintien d'une telle capacité nécessite la mise en œuvre de cycles de formation et d'entraînement adapté à chaque niveau de responsabilité à savoir : les **rédacteurs**, les **cadres**, et les **décideurs**.

Pour répondre à ce besoin, l'Institut Français d'Enseignement Stratégique et Opératif (IFESO) a développé un ensemble unique de programmes, à destination des armées françaises ainsi que des pays et des organisations avec lesquels la France a des relations de coopération, qui permet d'acquérir cette aptitude au commandement des opérations interarmées dans une approche globale des crises. En procédant à l'analyse fine des besoins de ses clients, l'IFESO propose un programme d'acquisition et de maintien de capacité **adapté** aux besoins du client et qui comprend la **formation** et l'**entraînement** du personnel mais également l'**adaptation des organisations** (audit et conseil) ainsi que l'**élaboration des procédures** (*Standard Operating Procedures – SOPs*). Les stages développés, qui constituent la base des prestations proposées, figurent en annexe A.

Constitué autour d'un noyau d'anciens officiers experts de ces domaines, son réseau permet de mobiliser des compétences et des expériences très larges, françaises ou étrangères.

## 2 Principes pédagogiques

### 2.1 Principes

L'objectif principal des programmes proposés est la prise puis le maintien d'une capacité opérationnelle choisie. Ils s'articulent autour de briques pédagogiques différentes en fonction du but à atteindre.

Les sessions de formations proposées se fondent sur les deux principes suivants :

- La place centrale de la pratique dans un souci d'une pédagogie efficace et attractive ;
- L'innovation et l'utilisation des nouvelles technologies :
  - Le e-learning ;
  - La classe virtuelle ;
  - La simulation. Notre partenariat avec MASA nous permet de réaliser des vignettes ou des exercices de tous niveaux.

Un cursus complet permet l'acquisition de connaissances, la prise de compétence et l'approfondissement.

## Confidentiel Société

Cinq types de briques de formation sont disponibles pour chaque niveau de responsabilité :

Le e-learning : La formation en e-learning permet aux stagiaires d'appréhender les concepts, méthodes et définitions au travers de courtes vidéos, de fiches de synthèse, de questions ciblées et surtout d'exemples.

Les stages d'application : Les stages d'application, reprennent les points majeurs de la méthode enseignée mais s'attachent principalement à faire pratiquer les stagiaires dans des travaux dirigés qui prennent la forme de vignettes. Ces vignettes visent à maîtriser une problématique sur une étape de la méthode en planification ou en conduite d'opération. Selon les niveaux des stagiaires, elles proposent tout ou partie de travaux d'état-major qui sont à compléter, à synthétiser, à amender ou à utiliser pour la prise de décision, selon les cas. Les stages d'application peuvent se dérouler indifféremment en présentiel ou en classe virtuelle.

Les exercices d'entraînement : Les exercices d'entraînement constituent une synthèse de l'enseignement collectif. Ces exercices utilisent les produits de planification élaborés par les stagiaires, ils permettent de « jouer » le plan et se confronter à ses propres erreurs. Ces exercices peuvent utiliser une simulation qui augmente leurs réalismes. Comme pour les stages d'application, l'IFESO a développé une capacité pour conduire ces exercices en distanciel au moyen d'une plateforme de classe virtuelle.

La simulation : La simulation permet la modélisation de l'environnement opérationnel et des acteurs. Elle permet, grâce à une présentation dynamique de l'historique des opérations, une prise en compte rapide et complète de la situation par les joueurs. Elle modélise les ordres élaborés par les joueurs, elle restitue les résultats des actions entreprises, les comptes-rendus des échelons subordonnés, elle permet le rejeu ainsi que l'analyse après action. La simulation est également utilisée lors des stages de perfectionnement.

Les stages de perfectionnement : Les stages de perfectionnement proposent des mises en situation complexes centrées sur une fonction opérationnelle particulière. La simulation est systématiquement utilisée et permet un réalisme accru dans la modélisation de l'environnement.

Aujourd'hui, seul l'IFESO propose des cursus de formation complets et différenciés en fonction du niveau de responsabilité tenu par l'apprenant (rédacteur, chef de bureau/branche, décideur). Cette différenciation permet d'aborder à la fois les problématiques de fond dans le cadre des procédures enseignées, mais aussi le management et le fonctionnement d'un groupe de travail pluridisciplinaire.

Les cours sont généralement délivrés dans le pays et l'infrastructure du client. Sous réserve d'anticipation et d'évaluation du financement, il est possible d'envisager de conduire ces formations en France, dans une infrastructure que nous proposerions.

## 2.2 Méthodologie

### 2.2.1 Analyse du besoin

La compréhension complète du besoin exact du client est essentielle à la construction d'un programme d'acquisition de capacité pertinent. Cette analyse est systématiquement effectuée, quelle que soit la prestation demandée.

En fonction du client, elle peut être conduite de plusieurs manières : échange de courriers, séances d'analyse, rédaction de dossier d'exercice. L'annexe C montre l'outil de préparation d'un programme de formation.

L'analyse s'effectue en deux étapes :

- **Etape1 : objectifs d'entraînement (cadre 1)**

La définition précise des objectifs d'entraînement est le préalable à toute proposition de programme. En fonction de la complexité des compétences à acquérir ou entraîné, les objectifs détaillés sont soit exprimés par le client soit développés avec lui. Ils sont tirés du référentiel des emplois de la défense (REDEF). Les principales compétences que nous proposons d'acquérir sont en annexe D.

- **Etape 2 : élaboration d'une proposition de programme (cadres 2 & 3)**

Les briques pédagogiques du programme sont proposées soit à partir des stages du catalogue (annexe A), soit de leur adaptation dans certains cas particuliers. Un processus itératif avec le client permet de tailler sur mesure le programme de formation. Une fois validé, le programme est chiffré et une proposition technique et commerciale ou un simple devis sont soumis au client pour validation.

### 2.2.2 Construction et délivrance du programme

Après étude des besoins du client, l'IFESO propose un programme de formation à partir des briques pédagogiques disponibles en alternant cinq types de sessions :

- 'Classique' en présentiel ;
- E-learning ;
- « **Blended learning<sup>1</sup>** » présentiel. Elles comprennent de l'enseignement à distance en ligne et des cours magistraux s'appuyant sur les documents de doctrine français, de l'Union Européenne, de l'OTAN ou de l'ONU. Chaque concept est explicité et illustré par des exemples issus de l'expérience des formateurs de l'IFESO. Puis une réflexion est proposée aux stagiaires, sous deux formes :
  - Les **vignettes** : les stagiaires, regroupés en comités de 6 à 10 apprenants, étudieront des documents, des appréciations de situation, des ordres afin de stimuler leur sens critique puis élaboreront eux-mêmes les produits requis dans le cadre des processus et procédures imposés pour développer leur imagination. Certaines vignettes peuvent être assistées par la simulation pour les rendre plus réalistes ;

---

<sup>1</sup> Le *Blended Learning*, ou pédagogie mixte, est un modèle de formation mixte intégrant présentiel et numérique. Il permet de limiter au strict minimum les cours magistraux où le formateur défile sa présentation sur une estrade. Ils sont remplacés par des supports d'apprentissage à distance. La formation présentielle se concentre alors sur l'humain : difficultés individuelles, exercices de mise en pratique, simulations...

## Confidentiel Société

- Les **travaux dirigés** (TD) : réalisés en classe complète, les TD sont animés par l'enseignant qui interagit avec les apprenants pour élaborer une solution. Ces exercices pratiques représentent environ 70% des stages proposés ;
- « **Blended learning** » classe virtuelle. Identique dans son principe au « *Blended learning* » présentiel, le stage se déroule en ligne dans une classe virtuelle qui reproduit fidèlement les conditions d'interactions du présentiel. Les stagiaires doivent disposer d'un équipement incluant caméra et micro et d'une connexion internet stable.

Toutes les formations proposées peuvent être réalisées en « *Blended learning* ». Les formations dites 'avancées' sont conduites en « *Blended learning* » et assistées par la simulation.

- **Exercice de PC assisté par la simulation** (CPX-CAX), quel qu'en soit le niveau (du bataillon au niveau stratégique, pour 25 à 90 entrainés). L'apport de la simulation permet une appropriation rapide de la situation initiale par les apprenants, une mise en situation réaliste durant l'exercice et une capacité de re-jeu ou d'analyse après action qui permettent une acquisition rapide des objectifs d'entraînement. Ces exercices peuvent s'adresser à des états-majors complets ou à certaines fonctions opérationnelles particulières, le reste de l'environnement étant simulé.

### 2.2.3 Scénario

Les travaux pratiques nécessitent l'utilisation d'un scénario, fictif ou réel, mais suffisamment réaliste pour apporter la complexité nécessaire à la compréhension des concepts. La seule vertu du scénario est de permettre une réflexion de bon niveau et la production des documents. Il doit être adapté aux intérêts stratégiques du client.

Le développement de scénario est consommateur de temps. Pour limiter l'impact financier, le cadrage des données du scénario est généralement proposé par le client. L'annexe B propose un format d'élaboration des données nécessaires, qu'il s'agisse d'une adaptation ou d'un développement complet.

### 2.2.4 Langue

Tous les supports utilisés peuvent être en langue anglaise, ce qui constitue un gage d'interopérabilité, ou en français. Lorsque les cours sont dispensés en anglais, l'IFESO dispose d'un avantage apprécié par sa clientèle : nos instructeurs, dont l'anglais n'est pas la langue maternelle, comprennent les difficultés des stagiaires à s'exprimer dans une langue étrangère et prennent le temps nécessaire en insistant particulièrement sur les notions les plus complexes à appréhender. Bien évidemment, les cours peuvent également être dispensés en français. Lorsque cela est nécessaire, il peut être fait appel à la traduction simultanée, lorsque ni le français ni l'anglais ne sont couramment parlés par les apprenants. Dans ce cas, les programmes sont adaptés afin de prendre en compte le temps pris par les traductions.

### 2.2.5 Evaluation des stagiaires

L'évaluation des stagiaires est préparée en fonction du besoin du client et est adapté à chaque programme de formation.

Elle peut être établie à partir des éléments suivants :

## Confidentiel Société

- Questionnaires type QCM, en présentiel ou classe virtuelle. Dans ce cas, les notes sont fournies au client à la fin du programme.
- Questionnaires de type examen dans les parcours de e-learning. Un taux de réussite de 70% au test conditionne l'ouverture de la suite du parcours ou l'accès à la fin de celui-ci.
- Appréciation du stagiaire. En fonction du besoin exprimé par le client, chaque stagiaire peut faire l'objet d'une appréciation portant sur :
  - L'assiduité (présence à tous les modules d'enseignement) ;
  - La pertinence des idées émises lors des vignettes et travaux dirigés ;
  - La qualité des restitutions faites (présentations, briefings).

L'évaluation porte sur la connaissance des termes et la maîtrise des concepts et des procédures utilisées ainsi que sur la compréhension des attendus.

L'évaluation collective durant les exercices demeure une prérogative du commandement de l'unité entraînée. L'IFESO peut, à la demande du client, y contribuer, en particulier au moyen des outils proposés par la simulation.

### 2.2.6 Certification professionnelle

Les prestations délivrées par l'IFESO concernant la formation au commandement des opérations interarmées au niveau opératif sont labélisées par le Commandement pour les Opérations Interarmées (CPOIA) français.

Cette labellisation permet, lorsqu'un client en fait la demande, de proposer des cursus de formation permettant in fine la délivrance de la qualification opérative N°1 par le CPOIA. L'octroi individuel de cette qualification demeure une prérogative de l'institution militaire et ne pourra être étudié que si les critères d'évaluation décrits plus haut sont remplis et fournis au CPOIA par l'IFESO.

### 2.2.7 Sélection et formation des instructeurs de l'IFESO

L'ensemble des cursus de formation incluant, les programmes, les cours, les travaux dirigés, les éléments d'animation des exercices est élaboré par les équipes de l'IFESO et contrôlé puis certifié par le conseil pédagogique de la société dirigé par son président et son directeur général. Les formateurs de l'IFESO font l'objet d'une sélection stricte suivi d'une formation en double avant d'être admis à enseigner et éventuellement à diriger une formation.

### 2.2.8 Retour d'expérience et contrôle de la qualité

**RETEX** : Le processus de retour d'expérience (RETEX) contribue au contrôle de la qualité mais également à l'amélioration constante des produits. Il peut se décliner en plusieurs étapes :

- Recueil de l'avis des apprenants dans un **Module RETEX** inclus dans chaque parcours de e-learning. Lorsque le programme de formation est dispensé en « *Blended learning* », le module RETEX couvre l'ensemble de la formation (e-learning et présentiel ou classe virtuelle) ;
- Séance d'**Analyse Après Action (AAA)** : lorsque les formations ne comprennent pas de e-learning, une séance d'AAA est systématiquement conduite. Chaque apprenant ou groupe d'apprenant doit formuler trois points positifs et trois points

## Confidentiel Société

négatifs au sujet de la formation. Ces points sont discutés en séance. Ils font ensuite l'objet d'un compte-rendu, qui propose également les pistes d'amélioration ;

- Séance de **RETEX à froid** : à partir de l'AAA, une séance de retour d'expérience à froid avec le client permet de valider les évolutions à apporter au programme de formation et d'améliorer les contenus ou les méthodes en vue des prochaines sessions. Cette séance est parfois enrichie par des questionnaires à froids envoyés aux stagiaires par le client six mois après la formation. L'analyse de ces questionnaires permet de valider l'adaptation de la formation à l'emploi des stagiaires.

L'organisation du processus de RETEX est préparée avec le client avant le début des formations.

### Contrôle de la qualité

Le contrôle de la qualité des prestations, interne à l'IFESO, est systématiquement mis en œuvre et fait l'objet d'une attention constante.

- **Avant les formations** : L'ensemble des cours et des produits pédagogiques est revu juste après la phase de conception en comité de relecture. En particulier, tous les produits destinés au e-learning sont revus tant d'un point de vue technique que du contenu avant publication ou mise en ligne.
- **Pendant les formations** : Le suivi et l'adaptation en temps réel de chaque session de formation en lien avec le client est systématique. Ils se concrétisent par une réunion quotidienne qui permet d'identifier les améliorations à apporter immédiatement et celles devant être capturées pour les futures sessions.
- **Après les formations** : l'analyse à chaud (AAA) et le processus de RETEX sont exploités afin d'identifier les modifications à apporter aux futures sessions.
- **De façon périodique** : Le conseil de perfectionnement d'IFESO est un organe consultatif qui se réunit au moins une fois par an. Son rôle consiste à débattre sur les résultats des évaluations des formations par les stagiaires, via les processus de retour d'expérience (RETEX) et d'en tirer des enseignements pour l'évolution des prestations IFESO en maintenant la cohérence entre les différents parcours et les objectifs de formation ainsi que la conformité avec la délivrance de la qualification opérative N°1
- **Veille doctrinale** : Une veille de l'évolution de la doctrine, des retours d'expérience des opérations est mise en œuvre par IFESO. Grâce à son réseau étendu et ses liens étroits avec le ministère des armées, IFESO a accès à la banque de données de la doctrine et est capable de mettre à jour ses produits sans délai.

## 3 Accès aux formations

### 3.1 *Règlement de l'IFESO pour la formation*

Les stagiaires en formation sont soumis au respect du règlement de l'IFESO pour la formation. Cependant, comme il est stipulé dans le règlement, et conformément à l'article R.6352-1 du Code du Travail, lorsque la formation se déroule dans une entreprise ou un établissement déjà doté d'un règlement intérieur, les mesures d'hygiène et de sécurité applicables aux stagiaires

## Confidentiel Société

sont celles de ce dernier règlement. Ce dernier cas constitue le cadre général des formations dispensées.

Le règlement pour la formation est systématiquement présenté et expliqué en début de chaque formation.

### **3.2 Accès aux personnes handicapées**

IFESO est engagé résolument dans le soutien aux personnes handicapées pour l'accès à la formation professionnelle. Le référent handicap de la société s'assure de la prise en compte du handicap lors de la préparation et du déroulement des sessions.

#### **3.2.1 Accessibilité au site de la formation**

Les prestations d'enseignement ou de formation sont généralement délivrées chez le client. Dans ce cas, le référent handicap s'assure en amont de la formation que le client a pris les mesures nécessaires à l'accessibilité des classes. En cas de prestation dans des locaux proposés par l'IFESO, l'accessibilité aux PMR est alors vérifiée avant la location des lieux.

#### **3.2.2 Accessibilité au contenu de la formation**

La présence de personnes en situation de handicap dans les formations doit être signalée par le client lors de la préparation de la session. Le cas échéant, les adaptations nécessaires sont adoptées (durée / rythme / méthodes / supports pédagogiques...) pour permettre l'accessibilité à la formation. L'IFESO maintient un lien avec APF France Handicap et l'AGEFIPH afin de suivre les évolutions et la réglementation dans ce domaine.

Dès à présent, la plateforme e-learning permet la redirection ou l'utilisation d'outils facilitant l'accessibilité pour les personnes en situation de handicap (par exemple : accès à des outils de sous-titrage, etc.).

## ANNEXE A : Catalogue des stages IFESO

Toutes les formations présentées dans cette annexe peuvent être complétées par un module d'enseignement à distance en ligne (e-learning).

L'intérêt de l'enseignement en ligne est d'assurer une compréhension commune à tous les stagiaires de concepts et notions de bases du stage comme prérequis à la participation à la session en présentiel. Cette session est ensuite beaucoup plus profitable pour l'ensemble de la classe.

Notre plateforme de e-learning permet des interactions avec les stagiaires aux moyens d'outils de partage et de dialogue semblables aux réseaux sociaux : *chat*, *webinaire*, etc.

Le développement d'un module adapté de e-learning pour un auditoire et un stage spécifique demande un effort important. Il doit être anticipé, et un minimum de quatre mois est nécessaire pour développer, fabriquer et contrôler un nouveau parcours.

La plupart des formations proposées peuvent se dérouler sous le format « *Blended learning* » + classe virtuelle.

Certains stages et exercices sont assistés par la simulation (nomenclature XXXX+ pour Avancé). Les prérequis pour assister à ces stages ou exercice est d'avoir suivi le curriculum initial.

Les fiches de stage du catalogue sont en conformité avec le standard OTAN.  
Tous les stages peuvent être adaptés au niveau d'ambition et au niveau de maturité du client.

Des stages supplémentaires, sur des sujets spécifiques peuvent être développés à la demande : renseignement interarmées, logistique interarmées, applications métiers (JOCWATCH, TOPFAS, JCOP, JEMM, etc.).

Joint Operations Operational Staff Officer Course	Course ID: JOBAS
<b>Purpose</b>	
Prepare assigned personnel to apply processes and method to provide analysis, assessment, and develop relevant products for submission to the approval and decision of an operational level commander	
<b>Performance Objectives</b>	
Staff Officers are capable of <b>understanding</b> joint operations, and of <b>contributing</b> to a joint operational planning group, in a national or multinational environment, applying NATO processes.	
<ul style="list-style-type: none"> <li>➤ <b>PO 1. Understand the fundamentals of joint operations in a comprehensive approach</b> <ul style="list-style-type: none"> <li>✓ ELO 1.1: Understand the principles of a joint campaign in the context of a comprehensive approach</li> <li>✓ ELO 1.2: Understand strategic and operational level organisation and responsibilities</li> <li>✓ ELO 1.3: Understand operational art and design concepts</li> </ul> </li> <li>➤ <b>PO 2. Understand the contributions of major functions to the decision cycle of an operational level HQ</b> <ul style="list-style-type: none"> <li>✓ ELO 2.1: Understand the contribution of Info Ops and Targeting</li> <li>✓ ELO 2.2: Understand the contribution of POLAD &amp; LEGAD</li> <li>✓ ELO 2.3: Understand the contribution of joint logistic (J4)</li> <li>✓ ELO 2.4: Understand the contribution of joint intelligence (J2)</li> <li>✓ ELO 2.5: Understand the contribution of civil-military cooperation – CIMIC (J9)</li> </ul> </li> <li>➤ <b>PO 3. Understand the role of JOC, J35 and J5 in the decision cycle and assessment process of an operational HQ</b> <ul style="list-style-type: none"> <li>✓ ELO 3.1: Understand the contribution and deliverables of a J3/JOC (current OPS)</li> <li>✓ ELO 3.2: Understand the contribution and deliverables of a J3/J35 (future OPS OPS)</li> <li>✓ ELO 3.3: Understand the contribution and deliverables of a J5 (future plans, campaign assessment)</li> </ul> </li> <li>➤ <b>PO 4. Understand and apply the principles of operational planning at operational level</b> <ul style="list-style-type: none"> <li>✓ ELO 4.1: Understand the major phases and output of operational planning</li> <li>✓ ELO 4.2: Understand and apply the operational level contribution to the development of strategic assessment and military response options (operational advice)</li> <li>✓ ELO 4.3: Understand the principles of organisation of a joint operational planning group (JOPG)</li> <li>✓ ELO 4.4: Understand the working processes of a JOPG</li> <li>✓ ELO 4.5: Scenario presentation</li> </ul> </li> <li>➤ <b>PO 5. Understand and apply COPD process during Operational Estimate Phase 3A-Mission Analysis</b> <ul style="list-style-type: none"> <li>✓ ELO 5.1: Develop a system perspective of the engagement space at operational level (PMESII)</li> <li>✓ ELO 5.2: Understand and apply the framing of the operational Level Problem</li> <li>✓ ELO 5.3: Understand and apply the analysis of the mission process</li> <li>✓ ELO 5.4: Understand and apply Operational Design development</li> <li>✓ ELO 5.5: Develop operational assumptions, limitations and risks</li> <li>✓ ELO 5.6: Develop Information Operations framework as part of Strategic Communications: messages, target audiences, goals, campaign narrative</li> <li>✓ ELO 5.7: Develop Initial force estimate and C2 requirement</li> <li>✓ ELO 5.8: Understand and produce Mission Analysis Briefing and Operational Planning Guidance</li> </ul> </li> <li>➤ <b>PO 6. Understand and apply COPD process during Operational Estimate Phase 3B-COA Development</b> <ul style="list-style-type: none"> <li>✓ ELO 6.1: Understand and apply preparation for COA development</li> <li>✓ ELO 6.2: Develop common factors for all options, including key operational requirements</li> </ul> </li> </ul>	

## Confidentiel Société

- ✓ ELO 6.3: Develop tentative COAs and conduct Commander's update
- ✓ ELO 6.4: Develop detailed description of each COA including key military tasks, risks, information operations, resources, logistic and C2 considerations
- ✓ ELO 6.5: Develop COA comparison and analysis
- ✓ ELO 6.6: Develop operational risk analysis
- ✓ ELO 6.7: Refine resources requirement
- ✓ ELO 6.8: Develop campaign assessment framework
- ✓ ELO 6.9: Understand and produce COA Decision Briefing
- ✓ ELO 6.10: Understand and produce refined CONOPS and Operational Planning Directive
- ✓ ELO 6.11: Understand CONOPS and OPLAN development

**Job Performance Outcome:** 300 – Advance level (Apply)

### Student Criteria

Background Knowledge - Prerequisites	Rank/Grade	Language Proficiency
Basic staff skills (how to staff documents, how to prepare and deliver a briefing to an authority) Basic knowledge of Microsoft Windows® and the common Microsoft Office® applications (Word®, PowerPoint® and Excel®)	Captain to Lieutenant-colonel	English or French SLP 3232

### Course Criteria

Duration / Delivery	Class Size Mini/Maxi	Facility - Equipment	
15 working days (three weeks)  • Classroom  • Blended learning + classroom  • Blended learning + virtual class	10 / 25	<ul style="list-style-type: none"> <li>• 1x plenary room, with 25 tables &amp; chairs, teacher desk and chair, 1x computer /projector/ screen, 2x white boards and associated stationary</li> <li>• 3x (minimum 2x) syndicate rooms with 10 x tables &amp; chairs, 1x computer /projector/ screen, 2x white boards, 2x paper boards and associated stationary</li> <li>• Ability to deliver basic admin tasks (e.g. printing)</li> </ul>

<b>NATO Comprehensive Operations Planning Course</b>	<b>Course ID: NCOPC</b>
<b>Purpose</b>	
<i>JPL-OP-36813</i>	
<b>Performance Objectives</b>	
<p>Staff Officers are capable of <b>understanding</b> joint operations, and of <b>contributing</b> to a joint operational planning group, in a NATO environment, applying NATO processes.</p> <p><b>PO 1:</b></p> <ol style="list-style-type: none"> <li>1. <b>Performance statement:</b> Identify the fundamentals of joint operations in a comprehensive approach, and the contribution of major functions</li> <li>2. <b>Conditions:</b> Day 1 E-learning, plenary room lecture, given scenario</li> <li>3. <b>Standards:</b> Student will: <ul style="list-style-type: none"> <li>Identify NATO OPP Phases</li> <li>Identify roles &amp; responsibilities of the different levels of command</li> <li>Identify roles &amp; responsibilities in a JOPG</li> <li>Understand the principles of a joint campaign in the context of a comprehensive approach</li> </ul> </li> <li>4. <b>Proficiency level:</b> 300</li> </ol> <p><b>PO 2:</b></p> <ol style="list-style-type: none"> <li>1. <b>Performance statement:</b> Perform the analysis to support the operational level appreciation of the crisis and operational advice on MROs (COPD Phase 1 – 2)</li> <li>2. <b>Conditions:</b> Day 1 – 2 E-learning, plenary sessions and syndicate workshops in separate rooms Joint Operational Planning Group and supporting elements (to include Strategic level) Given instructions, scenario, Commander’s guidance and strategic planning documents</li> <li>3. <b>Standards:</b> Student will: <ul style="list-style-type: none"> <li>Develop initial situation awareness</li> <li>Identify the strategic context</li> <li>Analyse SACEUR’s strategic assessment, guidance, and Military Response Options (MROs)</li> <li>Develop operational advise and submit to an operational commander</li> </ul> Warning </li> </ol> <p><b>Proficiency level:</b> 300</p> <p><b>PO 3:</b></p> <ol style="list-style-type: none"> <li>1. <b>Performance statement:</b> Apply COPD process during operational estimate Phase 3A-Mission analysis</li> </ol>	

**2. Conditions:**

Day 3 to day 6

Joint Operational Planning Group and supporting elements (to include strategic level).

E-learning, plenary sessions and syndicate workshops in separate rooms

Given scenario; Tactical level inputs; Given Commander's guidance

**3. Standards:**

Student will:

Identify major operational art concepts

Develop a system perspective of the engagement space at operational level (PMESII)

Understand the framing of the operational level problem

Apply the analysis of the mission process

Understand operational design development

Develop operational assumptions, limitations and risks

Develop Information operations framework as part of strategic communications: messages, target audiences, goals, campaign narrative

Develop Initial force estimate and C2 requirement

Produce Mission Analysis Briefing and operational planning guidance

**4. Proficiency level: 300**

**PO 4:**

**1. Performance statement:** Apply COPD process during operational estimate phase 3B-COA development

**2. Conditions:**

Day 7 to day 9

E-learning, plenary sessions and syndicate workshops in separate rooms

Joint Operational Planning Group and supporting elements (to include strategic level).

Given scenario, tactical level inputs, given Commander's guidance

**3. Standards:**

Student will:

Apply preparation for COA development

Develop common factors for all options, including key operational requirements

Produce tentative COAs and conduct Commander's update

Prepare detailed description of each COA including key military tasks, risks, information operations, resources, logistic and C2 considerations

Develop COA comparison and analysis

Develop operational risk analysis

Refine resources requirement

Produce COA Decision Briefing

**4. Proficiency level: 300**

**PO 5:**

**1. Performance statement:** Develop an Operational Plan (OPLAN) for execution and transition (COPD Phase 4 – 6)

**2. Conditions:**

Day 10

E-learning, plenary room lecture

## Confidentiel Société

Given scenario			
<b>3. Standards:</b> Students will: Refine CONOPS and Operational Planning Directive Perform CONOPS and OPLAN development Produce Fragmentation / Joint Coordination Orders, branch plans and sequels, assessment plans.			
<b>4. Proficiency Level:</b> 300

NATO Strategic Operations Planning Course	Course ID: NSOPC
<b>Purpose</b>	
<b>Performance Objectives</b>	
<p><b>PO 1:</b></p> <ol style="list-style-type: none"> <li>1. <b>Performance statement:</b> Identify the fundamentals of NATO’s Operations Planning Process within a comprehensive approach, and the contribution of major functions at the strategic level (COPD Chapter 3, the Strategic Level).</li> <li>2. <b>Conditions:</b> Day1 Plenary room lecture, COPD, given scenario.</li> <li>3. <b>Standards:</b> Student will:  <ul style="list-style-type: none"> <li>Identify NATO OPP Phases</li> <li>Identify roles &amp; responsibilities of the different levels of command</li> <li>Identify roles &amp; responsibilities in a Strategic Planning Group.</li> </ul> </li> <li>4. <b>Proficiency level:</b> 300</li> </ol> <p><b>PO 2:</b></p> <ol style="list-style-type: none"> <li>1. <b>Performance statement:</b> Perform the analysis to support the Strategic Assessment development (NCRP Phase 1 - 2, COPD Phase 1 - 2) within the Political-Military Estimate.</li> <li>2. <b>Conditions:</b> Day 1 – 2 Plenary sessions and syndicate workshops in separate rooms Strategic Planning Group Given instructions, scenario, Commander’s guidance and Political planning documents.</li> <li>3. <b>Standards:</b> Student will:  <ul style="list-style-type: none"> <li>Develop initial situation awareness</li> <li>Identify the political and strategic context</li> <li>Develop a system perspective of the engagement space at strategic level (PMESII)</li> <li>Develop SACEUR’s strategic assessment.</li> </ul> </li> <li>4. <b>Proficiency level:</b> 300</li> </ol> <p><b>PO 3:</b></p> <ol style="list-style-type: none"> <li>1. <b>Performance statement:</b> Apply COPD process during Political-Military Estimate at Strategic Level, Phase 3- Military Response Options Development.</li> <li>2. <b>Conditions:</b> Day 3 Strategic Planning Group and supporting elements Plenary sessions and syndicate workshops in separate rooms Given scenario, Operational level inputs, Given Commander’s guidance.</li> </ol>	

**3. Standards:**

Student will:

- Apply the analysis of Political Direction and Guidance
- Develop MROs
- Compare MROs
- Produce MRO Analysis Briefing.

**4. Proficiency level:** 300

**PO 4:**

**1. Performance statement:** Apply COPD process during Strategic Political-Military Plan development, Phase 4a Strategic CONOPS development, drafting of the Strategic Planning Directive.

**2. Conditions:**

Day 4

- Plenary sessions and syndicate workshops in separate rooms
- Strategic Planning Group and supporting elements (to include strategic level)
- Given scenario, operational level inputs, given Commander's guidance.

**3. Standards:**

Student will:

- Apply preparation for Strategic CONOPS development
- Develop updating of the Selected Military Response Option
- Produce a draft of SACEUR's Strategic Intent and Guidance
- Prepare detailed description of paragraphs including risks, information activities, CoG, Strategic Effects, Preconditions for Success, Subordinate Missions and Objectives.

**4. Proficiency level:** 300

**PO 5:**

**1. Performance statement:** Apply COPD process during Strategic Political-Military Plan development, Phase 4b Strategic OPLAN development, and for execution and transition (COPD Phase 5 – 6).

**2. Conditions:**

Day 5

- Plenary room lectures
- Given scenario.

**3. Standards:**

Students will:

- Perform OPLAN development
- Describe Phases 3a-3b at Operational Level
- Develop plans during the execution of an operation.

**4. Proficiency Level:** 300

## ANNEXE B : Développement de scénario

Pour adapter les cours et les vignettes au cadre stratégique spécifique du client, l'IFESO développe les éléments de scénario sur une base choisie par le client.

Le format suivant permet de cadrer les besoins en éléments de scénario, en fonction du besoin du client.

Pour une adaptation d'un scénario existant, le client fournit les parties I à III.

En principe, tous les éléments de scénario développé par l'IFESO sont au format de documents opérationnels afin d'accoutumer les stagiaires à ce qu'ils rencontreraient dans la réalité.

Pour des besoins supplémentaires de développement de produits spécifiques, un devis serait nécessaire.

### SCENARIO DESCRIPTION TEMPLATE

#### *Scenario Name*

#### *PART I: Scenario setting*

Documents	Provided by client	To be developed by IFESO	
Maps		Real	Fictitious
Country books		Real	Fictitious
		Type/# of countries	
		Democratic	Autocratic
		Rogue	Failed

#### **Additional Guidance:**

- **Type of maps:** paper, electronic, scale, additional requirements (nautical and/or aeronautical charts and documents, etc.)

# Confidentiel Société

## Scenario Name

### **PART II: Crisis settings – Strategic Context**

<b>Documents</b>	<b>Provided by client</b>	<b>To be developed by IFESO</b>
Road to crisis		
Political Framework (UNSCR, Peace agreements, Defence Agreements, etc.)		
Strategic Assessment		
Military Response Options		
Political Guidance / Directive (NAC ID, IMD, DIP, ...)		
<b>Additional Guidance</b>		

# Confidentiel Société

## Scenario Name

### PART III: Crisis settings – Type of operation & Force level

Type of Operation	Expeditionary		Homeland Defence	
	Coalition	OTAN	UE	National
	Humanitarian	Peace enforcement	War fighting	NEO
Level of Force – Friendly side	<b>Air</b>	<b>Land</b>	<b>Maritime</b>	<b>Special Forces</b>
		Bon/Bde/Div/Corps	TU – TG - TF	SOTU / SOTG / SOCC
			ASU	SOTG
			ASW	SOATG
			Aircraft Carrier TG	SOMTG
			SSN - SSK	
Level of Force – Opposing side	<b>Air</b>	<b>Land</b>	<b>Maritime</b>	<b>Special Forces</b>
		Bon/Bde/Div/Corps	TU – TG - TF	SOTU / SOTG / SOCC
			ASU	SOTG
			ASW	SOATG
			Aircraft Carrier TG	SOMTG
			SSN - SSK	
	Asymmetric (militias)	IEDs	Insurgency	
<b>Additional Guidance</b>				

**Confidentiel Société**

*Scenario Name*

**PART IV: Operational documents**

<b>Documents</b>	<b>Provided by client</b>	<b>To be developed by IFESO</b>
Strategic Planning Directive		
Operational Commander’s Guidance for Mission Analysis		
Operational Mission Analysis Briefing		
Operational Decision Briefing		
Concept of operation		
Execution support documents (Vignettes)		
<b>Additional Guidance</b>		

*Scenario Name*

***PART V: Battle Staff Training – Exercise Support Documentation***

<b>Documents</b>	<b>Provided by client</b>	<b>To be developed by IFESO</b>
Training Objectives		
Concept of operation		
Joint Coordination Order (JCO)		
STARTEX Situation		
MEL MIL		

**Additional Guidance**

## ANNEXE C : Fiche de cadrage de formation
